EDUCATION

Binus University

Undergraduate Student, Computer Science (GPA: 3.70/4.00)

Jakarta, Indonesia

August 2024 - Expected August 2027

PROJECTS

<https://port-zazuay.vercel.app/> | *Next.js, TypeScript, Tailwind CSS, Framer Motion* | [Link](#) **September - October 2026**

- Designed, developed, and deployed a fully responsive personal portfolio website using Next.js, TypeScript, and Tailwind CSS to showcase academic projects, organizational leadership, and volunteer experiences.

GlucSense | *Django, REST API, Groq API (RAG), Supabase* | [Link](#) **June - August 2026**

- Built a diabetes education platform with a RAG-based AI chatbot (Groq API) handling mixed English/Indonesian input; owned the AI/chatbot build end-to-end (model integration, API work, data collection) and developed the frontend.

Bug Severity Classification | *Python, TF-IDF, Scikit-learn, NLTK, Pandas* | [Link](#) **June 2026**

- Deployed and led a team of 5 building an NLP pipeline that classified 112,000+ GitHub issue reports by severity using TF-IDF with Logistic Regression, Naive Bayes, and SVM, achieving 93.5% accuracy with the SVM model.

Emotion Classification in E-Commerce | *Python, XLM-R, IndoBERT, BiLSTM+FastText* | [Link](#) **June 2026**

- Led a team of 3 and handled the modeling, data processing, and the research paper comparing XLM-R, IndoBERT, and BiLSTM+FastText for emotion classification on Indonesian e-commerce reviews (PRDECT-ID dataset), with IndoBERT performing best at 72.05% accuracy and 68.78% macro F1.

StressPredict | *Python, Streamlit, LightGBM, Scikit-learn, FastAPI, Groq LLM* | [Link](#) **June 2026**

- Developed a web application to classify stress level into 3 classes; ran EDA, preprocessing, and benchmarking across 5 algorithms, selecting LightGBM (75.51% accuracy and 75.69% macro F1).

Schola | *Django, MySQL* | [Link](#) **June 2026**

- Led a team of 5 and developed a centralized scholarship platform: smart search/filtering, application tracking, and admin CRUD.
- Built the backend, authored UML diagrams (Use Case, Activity, Sequence, Class), and led black-box test case design and execution across the team's modules.

Fruit Freshness Classification | *Python, TensorFlow/Keras, OpenCV, MLflow* | [Link](#) **June 2026**

- Compared EfficientNetB0 and ResNet50V2 (transfer learning) for binary fruit freshness classification, with and without Gaussian Blur + CLAHE preprocessing, across a 359-image Kaggle dataset; ResNet50V2 with preprocessing performed best (94.4% accuracy, F1 0.944, zero false negatives on the fresh class).

LEADERSHIP & COMMUNITY

Computer Science Student Association (HIMTI) BINUS

Jakarta/Semarang, Indonesia

Manager of Publication and Marketing Semarang

Feb. 2026 - Feb. 2027

- Lead content and publication strategy for a team of 20 activists, reporting to the division's General Manager; personally design promotional material and provide live-reporting coverage for Jakarta-based HIMTI events, including a company visit to Apple Developer Academy Tangerang and the 2026 Digital Privacy webinar.
- Manage HIMTI Semarang's official Instagram account, growing monthly views from 1.8K to 19K and non-follower reach to 92% of views (Feb-Aug 2026).

Event Leader, Region Semarang (SESVENT 2025)

Sep - Oct 2025

- Led the event committee for HIMTI's activist-selection program in Semarang; supervised planning, scheduling, and assessment coordination for new members.

First Year Program, BINUS University

Semarang, Indonesia

Freshmen Leader & Freshmen Partner

July 2025 - June 2026

- Mentored and facilitated a class of 40+ freshmen at BINUS University as a Speaker for their orientation.
- Facilitated 20 weekly developmental sessions on critical soft skills, including time management and study guides.
- Supervised and mentored a group of 6 freshmen in a community-driven mangrove tree-planting movement at Tambak Lorok, Semarang.

Codeavour (International AI, Coding & Robotics Competition, Ages 7-18)

Jakarta, Indonesia

Ceremony Coordinator Volunteer

May 2026

- Coordinated the opening and closing ceremonies for the competition's Indonesia leg.

SKILLS AND FRAMEWORKS

Programming Language: Python, TypeScript, JavaScript, Java, C, Swift (iOS), HTML/CSS, MySQL

Framework/Libraries: Scikit-learn, TensorFlow/Keras, LightGBM, Pandas, NumPy, NLTK, OpenCV, FastText, TF-IDF, BERT/IndoBERT, XLM-R, BiLSTM, Django, FastAPI, Next.js, Tailwind CSS, Framer Motion

Developer Tools: Git, Groq API, Supabase, Streamlit, MLflow, Figma, Canva, Eclipse, Dev-C, Postman, Vercel, XAMPP
